# Who is this course for?

- TAFs ILSD, DCL, UE libre

Prerequisites:

- There are no prerequisites, however you will feel more comfortable if you:
  - have notions about operating Systems, in particular Linux
  - have notions about algorithms,
  - have some programming skills

# What is this course about?

Introductory (first) course in computer networking

- learn **principles** of computer networking
- learn **practice** of computer networking
- **Internet** architecture/protocols as case study

# Goals

- Understand the main **problems** of computer networks
- Understand the main **principles** solving such problems and technologies used in networks
- Know how to apply and analyze the different **network technologies**
- Being able to analyze a realistic scenario of **services deployment** over a network
- Understand the challenges related to **network security** and existing solutions

# Target skills (compétences)

CG	Niveau	Jetons
1. Comprendre et analyser, synthétiser un problème et/ou une situation complexes	3	3
2. Résoudre un problème complexe en alliant théorie et pratique	1	3
4. Critiquer et décider	2	3
14. S'engager	3	3

# Evaluation

- 2 TPs' reports
- 3 Labs' quizzes
- 3 Cours' quizzes
- 1 final exam divided into two parts

# Teaching Staff

Isabel Amigo

Michel Morvan

Christophe Lohr

Santiago Ruano

Sandrine Vaton

# Course approach

- A top-down approach:
  - end-system applications, end-end transport
  - network core: routing,
  - link-level protocols, e.g., Ethernet
  - other stuff: access technologies, Internet architecture, new paradigms, security
- A hands-on approach
  - Labs (lab work emulated environment), TPs (*Travaux Pratique* with real routers and switches) and CMs (*Cours Magistraux*)

# Course outline

1. Introduction (2x1h15)
2. Application layer (1x1h15)  
Lab DNS (2x1h15)
3. Information transport principles (2x1h15)  
Transport layer (1x1h15)  
TP Protocoles TCP, UDP, IP (2x1h15)
4. Networking layer (2x1h15)  
Lab OSPF (2x1h15)  
TP QoS (2x1h15)
5. Data link layer (2x1h15)  
Lab Ethernet (2x1h15)
6. Access technologies and Internet Architecture (2x1h15)
7. SDN, NFV, and Lab SDN (4x1h15)
8. Security (2x1h15) TP VPN (2x1h15)

# Course outline

1. Introduction (2x1h15)
2. Application layer (1x1h15)  
Lab DNS (2x1h15) **hands on!**
3. Information transport principles (2x1h15)  
Transport layer (1x1h15)  
TP Protocols TCP, UDP, IP (2x1h15) **hands on!**
4. Networking layer (2x1h15)  
Lab OSPF (2x1h15) **hands on!**  
TP QoS (2x1h15) **hands on!**
5. Data link layer (2x1h15)  
Lab Ethernet (2x1h15) **hands on!**
6. Access technologies and Internet Architecture (2x1h15)
7. SDN, NFV, and Lab SDN **hands on!** (4x1h15)
8. Security (2x1h15) TP VPN **hands on!** (2x1h15)

# Books and bibliography

## Some suggested resources

- Computer Networking: A Top Down Approach Featuring the Internet, J. Kurose, K. Ross, Pearson (available at the library)
- Computer Networks, Andrew S. Tanenbaum, David J. Wetherall, Pearson (available at the library)
- Computer Networking : Principles,Protocols and Practice, O. Bonaventure et al. (available online  
<https://www.computer-networking.info/>)

Please note courses do not substitute reading the bibliography!!
